CJA CHILDREN’S PROJECT FOR TU B’SHEVAT
Recycled Planter

Paula Coplon, Chair, CJA 2009

Materials:
base from a milk carton, small plastic container or any other container no larger than 6 - 7 inches square
scraps of fabric
scissors
Mod Podge or white glue
pebbles or aquarium rocks
soil

1. Be sure the item you are using for the base is thoroughly washed and dried prior to beginning.
2. Begin cutting out random shapes from the fabric. Use lots of fabrics. On one side of the container spread a thin layer of Mod Podge or glue (fingers are the best tool, but you can use foam brushes). Continue decorating around all 4 sides of the container.
3. Once all the spaces are filled in, put a final thin layer of the Modge Podge around it. It will dry clear and resist water when finished.
4. Fill the bottom ½ inch of the container with pebbles then top with soil.
5. Transfer parsley seedlings to container.
6. Place your “Parsley Planter” in a sunny window and water weekly.
7. Harvest the parsley for your Passover Seder.
